

NZ ETS forest-land spatial screening

Gisborne study design - synthetic demonstration

RUN SUMMARY

Input features: 12
Candidate review: 6
Quarantine: 5
Excluded by project proxy: 1
Automated reject rate: 50.0%

WIDTH DIAGNOSTIC

Proxy disagreements: 1 (G04)
2A/P and -15 m erosion are triage only.
Formal MPI width uses centre-line samples
at 20 m intervals.

DECISION BOUNDARY

Still unresolved: land history, species,
mature height and cover, legal rights,
and evidence authenticity. Failures retain
rule IDs and geometry for review.
