

NZ ETS forest-land spatial screening

Gisborne District open-data screening

RUN SUMMARY

Input features: 5748

Candidate review: 2520

Quarantine: 2926

Excluded by project proxy: 302

Automated reject rate: 56.2%

WIDTH DIAGNOSTIC

Proxy disagreements: 694

Examples:

lcdb1000002347

lcdb1000004900

lcdb1000008518-part-1

2A/P and -15 m erosion are triage only.

Formal MPI width uses centre-line samples

at 20 m intervals.

DECISION BOUNDARY

Still unresolved: land history, species, mature height and cover, legal rights, and evidence authenticity. Failures retain rule IDs and geometry for review.
