

NZ ETS forest-land spatial screening

Gisborne District open-data screening

RUN SUMMARY

Input LCDB units: 5712

Candidate review: 1641

Quarantine: 3871

Excluded by project proxy: 200

Automated reject rate: 71.3%

WIDTH DIAGNOSTIC

Proxy disagreements: 381

Examples:

lcdb1000002347

lcdb1000004900

lcdb1000008518-part-2

Rectangle width and -15 m erosion are triage only.

Formal MPI width uses centre-line samples

at 20 m intervals.

DECISION BOUNDARY

Still unresolved: land history, species, mature height and cover, legal rights, and evidence authenticity. Failures retain rule IDs and geometry for review.

SCREENING / TRIAGE ONLY - NOT AN ELIGIBILITY DETERMINATION | EPSG:2193
